 CABA, Buenos Aires

ABOUT ME

Experienced Backend Software Engineer with expertise in scalable system architecture, performance optimization, and security-focused, and testing development. Passionate about building high-performance distributed systems and improving software resilience and reliability. Strong background in Golang, cloud computing (AWS, GCP), databases, and security best practices.

IT EXPERIENCE

Software Engineer Mercado Libre | Jan, 2025- Present

- Promoted to SSR Software Engineer after playing a critical role in the development of a high-impact application that generated significant revenue for the company.

Software developer Mercado Libre | Mar, 2023- Jan 2025

- Developed and maintained high-volume transaction processing systems.
- Improved API response, optimizing database search time through indexing and using profiling tools.
- Implemented security enhancements through company-wide cybersecurity programs, improving application resilience and reliability.
- Designed and developed scalable microservices using Golang in a cloud-based architecture.

Full Stack Developer Drubbit | Jan, 2022 - Mar, 2023

- Led backend development efforts, ensuring seamless integration between frontend and backend systems.
- Developed and maintained RESTful APIs with a focus on scalability and security.
- Mentored junior developers, contributing to code quality and team growth.

EDUCATION

Universidad de Buenos Aires

Philosophy

- Developed strong analytical and problem-solving skills

TECHNICAL SKILLS

- Golang, Node.js, SQL (PostgreSQL, MySQL)
- AWS (Lambda, S3, IAM), Google Cloud, Docker, Kubernetes
- PostgreSQL, MySQL, Redis, Kafka
- Cybersecurity principles
- Monitoring Tools: Datadog, Grafana, Kibana, New Relic
- Testing: Unit, Integration, Functional, E2E, Regression
